● **Super Intensive** 35 Lessons

Super Intensive classes go even further! Here you will work closely with your teacher in smaller groups to help you reach your goals outside of the school environment. ● **Part time (PM)** 18 Lessons

Perfect for the working professional with evenings free to improve their language skills. This option will give you an opportunity to review and practice all aspects of language learning, covering all four skills (reading, writing, speaking, and listening), grammar, and vocabulary. The approach is very communicative and the classes are designed to be dynamic and engaging.

● **Bilingual** 42 Lessons

BLI bilingual program gives you the opportunity to learn, review and practice all aspects of language learning, covering all four skills (reading, writing, speaking, and listening), grammar, and vocabulary for both French and English. The bilingual program consists of French classes in the morning and English classes in the afternoon. The approach is communicative and student-centered and the classes are dynamic and engaging.

Class Description

General ESL/FSL

In this block of classes, students will learn all of the core grammar concepts necessary to improve their accuracy, fluency, and competency level in English and French. This is an interactive class where students have an opportunity to use grammar and learn about the rules through discovery, with the guidance of the teacher and some explicit explanations. More emphasis is placed on being able to communicate using the grammar point, which is why there are so many opportunities to practice and improve. Students will be able to practice the four language skills (listening, speaking, reading, and writing) in an integrated setting. Class topics a wide variety of relevant subjects through different learning techniques that encourage communication in a real-world environment. Students improve their language skills by using a course book as well as by participating in many varied activities to help them learn and progress.

Communication Workshop

This course practices core English/French functions and is structured around themes designed to improve natural everyday communication skills. The goal of this class is to develop fluency. There is a focus on speaking and interaction among students so that they can apply what they learned in their previous classes. The class is interactive and encourages team and group work in order to accomplish the goal of interacting like a native speaker and challenges students through tasks and project based activities such as role-plays, debates, discussion, story-telling, communicative or vocabulary games, and mini projects.

Specialized Elective ESL/FSL

This class is designed to help you speed up your learning process while allowing you the opportunity to select courses based on your specific interests and needs. Every session we offer a different specialized English/French course with a specific theme or central focus, such as English/French in films and music. Because there tend to be fewer students in this class, there is more individualized attention from the teacher.

Power Skills

This class will enhance your knowledge of specific language skills through various exercises and dynamic activities. Every session, there is a different focus, such as reading, writing, listening, speaking, vocabulary, and expressions, including idioms, as well as pronunciation and task-based learning. There are different sections that are tailored for each level, from beginner to advanced. You can practice your writing skills by producing a school newspaper, or develop your listening abilities by exploring the world of radio and podcasts.

"All BLI teachers are amazing and their classes are interactive which makes the learning process really dynamic and fun."
